

MIHIR MENON

SRM Institute of Science and Technology, Kattankulathur, Chennai, Tamil Nadu

☎ 9606536657 — ✉ mm0785@srmist.edu.in

PROFESSIONAL SUMMARY

CS undergraduate specialising in **Cloud Computing**, with hands-on experience across **AWS** and **Azure**. Deployed a live **DRM platform** at **HAL**; built multi-cloud **ML/NLP pipelines** for data privacy and predictive analytics.

EDUCATION

SRM Institute of Science and Technology <i>B.Tech in Computer Science and Engineering – Cloud Computing (CGPA: 8.33/10)</i>	2023 – 2027 Kattankulathur, TN
Sri Chaitanya PU College <i>Class XII (CBSE, PCMC) – 71.6%</i>	2021 – 2023 Bengaluru, Karnataka
Delhi Public School <i>Class X (CBSE) – 89.88%</i>	2019 – 2021 Bengaluru, Karnataka

TECHNICAL SKILLS

Languages: C++, Java, Python, JavaScript, SQL
Core Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, REST APIs
Cloud & DevOps: AWS (Lambda, SageMaker, Glue, Athena, API Gateway, Cognito), Azure, GCP, Docker, Kubernetes, Terraform
ML & AI: Machine Learning, NLP, RAG, Scikit-Learn, XGBoost, spaCy, BERT, Prompt Engineering
Web & Frameworks: React.js, Node.js, Flask, HTML/CSS, Firebase, MySQL
Tools: Git, GitHub, n8n, Figma, Cisco Packet Tracer

EXPERIENCE

Hindustan Aeronautics Limited (HAL) <i>Intern – Developer</i>	Jun 2025 – Aug 2025 Bengaluru, Karnataka
- Contributed to the development of an on-premise Digital Rights Management (DRM) application, deployed as a live internal system. - Built a production-ready application for generating dynamic flowcharts and operational procedures to streamline snag resolution. - Gained hands-on experience in backend development, application deployment, and RAG-based solution integration. - Received a Letter of Appreciation for significant contributions to the project; worked within HAL's ERP workflows and enterprise security practices.	
F.A.S.T — Official NVIDIA Student Developer Club <i>Corporate Head</i>	Nov 2025 – Present Kattankulathur, TN
- Established partnerships with technology companies and developer communities to support club initiatives. - Organised national-level hackathons, coding competitions, and technical workshops, coordinating with technical teams on execution.	

PROJECTS

AI-Powered Multi-Cloud PII Redaction System <i>Python, AWS Lambda, SageMaker, spaCy, BERT, Terraform</i>	Jan 2026 – Apr 2026
- Built a multi-cloud pipeline that automatically detects and masks sensitive personal data in PDFs and text files, replacing values with readable pseudonyms. - Implemented 3-layer detection: NER models (BERT, spaCy trained on CoNLL-2003 and OntoNotes), regex for structured patterns, and heuristic fallback rules. - Deployed compute on AWS (Lambda, SageMaker, Cognito, API Gateway) with Azure Blob Storage for secure output; provisioned end-to-end via Terraform.	
DRM Solution <i>Python, PyQt6, Cryptography</i> HAL	Jun 2025 – Jul 2025
- Shipped an on-premise DRM system as a live application at HAL, serving 100+ users across multiple departments. - Engineered a hybrid RSA-2048 + AES-128/HMAC licensing model enforcing 5 configurable access rules (expiry, password, device lock, view cap) across a 6-stage validation pipeline. - Built screenshot/recording prevention, 11 watermark patterns, and signature-verified tamper-proof packaging.	
AWS-Driven Churn Predictive Analytics Pipeline <i>Python, SageMaker, Glue, Athena, XGBoost</i>	Jul 2025 – Oct 2025
- Built and tuned XGBoost models to predict customer attrition, improving accuracy through feature engineering on customer behaviour data. - Orchestrated the data pipeline across AWS Glue and Athena, translating model outputs into actionable retention recommendations.	

CERTIFICATIONS

- **Microsoft Certified:** Azure Data Fundamentals, Azure AI Fundamentals (Apr 2026)
- **AWS:** Data Engineering on AWS – Foundations (Mar 2026) **Cisco:** Networking Basics (Oct 2025) **NPTEL:** Programming in Java (Oct 2024)
